SUMMARY

With over Two years of experience in Frontend Development utilizing ReactJS, I have consistently demonstrated the ability to exceed expectations and drive growth within the software development industry. I am dedicated to contributing to projects that leverage technology effectively to enhance user experience and deliver innovative solutions. Additionally, I am keen to further develop my project management skills and work in a multicultural environment to achieve tangible results that contribute to the organization's success. With a continuously expanding skill set, I am eager to bring my expertise to your team and make a meaningful contribution to the field of software development.

PROFESSIONAL EXPERIENCE

Pulpo Tech , Front End Developer (React.js) **(January 2024 – Present)**

- Develop and maintain user interfaces for web applications using React.js.
- Utilize various libraries and frameworks including Redux, Zustand, React Query, and Material-UI.
- Write clean, reusable, and maintainable code following best practices.
- Implement responsive design principles to ensure applications function seamlessly across all screen sizes.
- Optimize component performance to ensure maximum efficiency across a wide range of devices and browsers.
- Develop and implement features for E-commerce, Portfolio, and Dashboard projects to ensure a smooth and effective user experience.
- Debug and resolve technical issues as they arise.
- Conduct code reviews, continuously improve code quality, and maintain code integrity.
- Stay updated with the latest trends and technologies in the industry to ensure applications are modern and competitive.

Freelancer , Front End Developer (React.js) **(June 2023 – Present)**

- Participate in code reviews to ensure code quality and share knowledge with the team.
- Contribute to improving development processes and workflows.
- Develop new interactive user-facing features using *React.js*.
- Build reusable components and front-end libraries for future use.
- Translate designs and wireframes into high-quality code.
- Optimize components for maximum performance across a wide range of web-capable devices and browsers.
- Design and develop an e-commerce website that serves as a platform for individuals to engage in buying, selling, and trading products or services online. It includes features that enhance the user experience, including easy and secure shopping.
- Occasionally, I was assigned projects that involved certain issues or required modifications, and I was responsible for troubleshooting and implementing the necessary adjustments.

EDUCATION

Bachelor In Information Technology (2025 – Present) Syrian

Virtual University.

Technical Computer College (2018 – 2022)

Damascus University, Software Engineer.

PROJECTS:

- **gameWeb:**
A dynamic platform showcasing detailed information and images about various games. Users can explore game descriptions, view screenshots, and discover recommendations for similar games, enhancing their overall gaming experience.

- **Movix:**
A comprehensive platform that offers detailed information, images, trailers, and ratings for a wide range of movies. Users can browse through movie summaries, view highquality images, watch trailers, and get recommendations for similar films, providing a complete and immersive cinematic experience.
- **Aurura:**
A salon website based in Dubai, designed to showcase the salon's services and pricing. The site offers a user-friendly interface for browsing various beauty and wellness services available at the salon, along with detailed pricing information.
- **Media:**
A platform for a graphic design, video editing, CGI, and advertising company. The website functions as both a portfolio and a service showcase, highlighting the company's expertise in visual design, motion graphics, and advertising solutions. It also includes a Dashboard for easy management, addition, and modification of all pages.
- **OPAL:**
An e-commerce platform specializing in selling modest women's clothing. The website provides a full online shopping experience, featuring a large variety of clothing, along with a comprehensive Dashboard to manage inventory and sales. Additionally, there is an information page dedicated to showing OPAL store locations across different regions.
- **Quran Memorization Platform:**
 - Developed a comprehensive platform dedicated to Quran memorization and learning, featuring various functionalities for students, teachers, and administrators:
 - Students can join courses, attend live sessions, and receive notifications about upcoming memorization and attendance sessions.
 - Teachers have the ability to manage their courses, schedule attendance sessions, request memorization from specific students, and assess students' progress.
 - Admins have full control over the platform, including managing user accounts, courses, evaluations, and notifications.
 - The platform was implemented using React, Zustand, useQuery, Material UI, and other frontend technologies to ensure optimal performance and an engaging user experience.

TRAINING COURSES

- ✦ Implement High-Fidelity Designs with Material UI & React.js – Udemy.
- ✦ Complete JavaScript Course – Elzero Web School.

TECHNICAL SKILLS

- **Languages & Libraries:** JavaScript (ES6+), HTML, CSS, Tailwind CSS
- **Frameworks & Tools:** React.js, Redux Toolkit, Zustand, React Query
- **UI/UX & Design:** Material-UI, Framer Motion, Responsive Design, Accessibility
- **Performance & SEO:** Page Speed Optimization, SEO Best Practices
- **API & State Management:** RESTful APIs, Axios, React Hook Form
- **Version Control & Collaboration:** Git, GitHub, Bitbucket

LANGUAGES

- ✦ **Arabic:** Native Language.
- ✦ **English:** Good.
